

TREND

- > **Fertility** ... convergence by 2065 (linear change)
- > **Migration** ... constant out-migration rates; inflows according to baseline (2006-2010)
- > **Mortality** ... no differences by religion (calculations based on UN 2012 assumptions for Austria)
- > **Religious mobility** ... Constant switching rates (Catholic & Protestant) and decrease from baseline (2006-2010) to 50% of baseline level by 2030; constant beyond 2030
- > **Intergenerational transmission of religion** ... constant from baseline (2006-2010)

SECULARISATION

- > **Fertility** ... fast convergence by 2036 (linear change)
- > **Migration** ... constant out-migration rates; constant inflows – only EU and internal migration
- > **Mortality** ... no differences by religion (calculations based on UN 2012 assumptions for Austria)
- > **Religious mobility** ... Constant switching rates (Catholic & Protestant) acc. to baseline
- > **Intergenerational transmission of religion** ... constant from baseline (2006-2010) – as TREND

SEGMENTATION

- > **Fertility** ... slow convergence by 2100 (linear change)
- > **Migration** ... constant out-migration rates; inflows constant from EU and 50% higher from non-EU
- > **Mortality** ... no differences by religion (calculations based on UN 2012 assumptions for Austria)
- > **Religious mobility** ... Constant switching rates (Catholic & Protestant) and decrease from baseline (2006-2010) to 25% of baseline level by 2030
- > **Intergenerational transmission** ... no adjustment rates: all children inherit mother's religion
